

ABSTRACT

WA-I-483

MASON-DIXON LINE: MILESTONE NO. 96(99)

1767 (reset 1902)

Rocky Forge, Maryland

Public/private

Milestone No. 96(99) marks Mason and Dixon's 96th horizontal mile west of the northeast corner of Maryland, the beginning of their 230.228-mile West Line, later known as the Mason-Dixon Line, famous for its historical impact and innovative survey methods. It is an original milestone of 1767, quarried and carved in England, of oolitic limestone, and remains in fair condition, unaltered, at its original site, preliminarily surveyed in 1765, set two years later, then reset more securely in 1902 during the 1900-03 Resurvey of the Maryland-Pennsylvania boundary. It now stands only about 6 inches above a brushy mound, measures a little over 12 inches square, and the top is badly disfigured and weathered. ^{What can be seen of} the distinguishing embellishments indicates some remains: vertical fluting ^{with horizontally-fluted margins} on only two sides (none exposed on north or east sides), and the Roman capital letters P on the north side facing Pennsylvania and M on the south side facing Maryland, ^{still fairly clear} each V-sunk in the center of shallow plain circle panels (no longer discernible). On the national and state levels, No. 96(99) is significant primarily as one of 135 original monuments in the thematic group series of some 248 markers still defining the West Line. Locally, as one of 48 original monuments marking the present Washington/Franklin-Fulton county boundary (10 crownstones; 38 milestones), this milestone is also significant as one of a diminishing number of objects and structures with a visually identifiable relationship to the colonial and Civil War heritage of these counties.

DESCRIBE THE PRESENT AND ORIGINAL (IF KNOWN) PHYSICAL APPEARANCE

Milestone No. 96(99) marks Mason and Dixon's 96th horizontal mile west of the northeast corner of Maryland, the beginning of their 230.228-mile West Line. It is the original milestone set at this site in 1767, reset more securely in 1902 during the 1900-03 Resurvey of the Maryland-Pennsylvania boundary. It is in only fair condition, though unaltered; is firmly in place but stands only about 6 inches above ground.

The area here is ^{rural}very sparsely settled open farmland, gently hilly, with fringes of trees following the East Branch of ^{Little}Antietam Creek to the north and ^{Little}Antietam Creek a short distance west. The site is at the eastern edge of a scattered settlement called Rocky Forge, MD; about 2 miles southwest of the center of the town of Waynesboro, PA; within Election District 9 of Washington County, MD, and Washington Township of Franklin County, PA; at a point about 2200 feet east of MD 60/PA 316 and about 1200 feet due south of Lyons Road (T363), about 1500 feet south southwest of the Foster's house; ^{protected by the Fosters}in a scraggly small mound of earth in the middle of an open, unfenced cultivated field. The site cannot be seen from any ^{public}road, but the brushy mound with its several posts can be easily spotted from the ^{private}gravel road leading to the house south of the Fosters.

The milestone, as with all original Mason and Dixon West Line monuments, was quarried and carved in England, of oolitic limestone, and initially measured about 12 inches square by about 4½ feet long with a low pyramidal top, cut to stand ^{as a post}above ground, with the base left rough-cut for setting into the ground. The distinguishing embellishments are the vertical fluting with horizontally-fluted margins on all ^{four}sides, and the Roman capital letters P on the north side facing Pennsylvania and M on the south side facing Maryland, each V-sunk in the center of a shallow plain circle panel near the top. In 1902 it was presumably reset to stand about 1½ feet high; and by the 1979-82 field inspection ^{the top}was exposed only about 6 inches above the mound. The letters appeared to be fairly intact and clear; some fluting and bits of margins remained; the top was very disfigured and weatherworn, badly chipped ^(particularly the northwest)at the corners and edges, scarred from linear cuts and two pits. And measured a little over 12 inches square.

(see Thematic Group National Register nomination form for full descriptions of the original Mason and Dixon monuments and the 1900-03 Resurvey method of resetting them)
